

Kinnesswood In Bloom (KiB) Bonus Ball Fundraiser Rules – October 2015

Basics of the game

The KiB bonus ball is primarily a fundraiser for the activities of the group - our game includes a weekly prize draw element plus a lottery syndicate element.

The 49 numbers (1 to 49) of the original UK Lottery game are purchased by our supporters for £1 per number per week thus raising a maximum of £49 each week when all numbers are taken.

The holder of the number drawn as the bonus ball on the Saturday Lotto draw is our prize draw winner.

The funds raised are also used to purchase one EuroMillions ticket for each Friday draw and one UK Lotto ticket for each Saturday draw – both as “lucky dips”.

Rules of the game

All players listed on the current record sheet maintained by the organisers are deemed to have accepted the rules of play as outlined below.

The minimum age of players is 16.

Record of participants/ticket

The organisers will maintain a record sheet detailing which numbers are allocated to which players – players may elect to pay for one or more numbers to boost their contribution to the fundraiser and increase their proportion of any EuroMillions/Lotto wins.

The record sheet serves as a “ticket” and a printed copy is available from the KiB website – <http://www.kinnesswoodinbloom.org/bonusball>

Prize draw element

The holder of the number drawn as the bonus ball on each Saturday UK Lotto wins £30.

If the Saturday Lotto bonus ball number is one of the new numbers introduced in October 2015 (50 to 59) the £30 prize rolls over until the Saturday bonus ball next falls between 1 and 49.

The prize draw element of the game is a small society lottery operated under KiB’s registration with PKC.

Lottery syndicate element

Should there be any significant winnings on the EuroMillions or Lotto tickets purchased then those winnings will be divided and allocated to the various fundraiser players on the basis of $1/49^{\text{th}}$ per number purchased – so a player who has purchased a single number will receive $1/49^{\text{th}}$ of the total win, a player with two numbers would receive $2/49^{\text{ths}}$ and so on.

Payment

The organisers operate a flexible payment system where players can pay several weeks or months in advance or pay ad hoc when the organisers choose to collect. All players listed on the current game sheet are considered to be “in the game” and eligible for the prize draw and their appropriate share of any EuroMillions/Lotto winnings.

Fundraising

When all 49 numbers are taken we raise £49 per week, £30 is used as the prize fund, £2 each for the EuroMillions/Lotto tickets leaving £15 towards KiB funds.
